

Step-by-Step Instructions on how to Install Citrix client with Screwdrivers for MAC Users

Minimum System Requirements from Home or Office

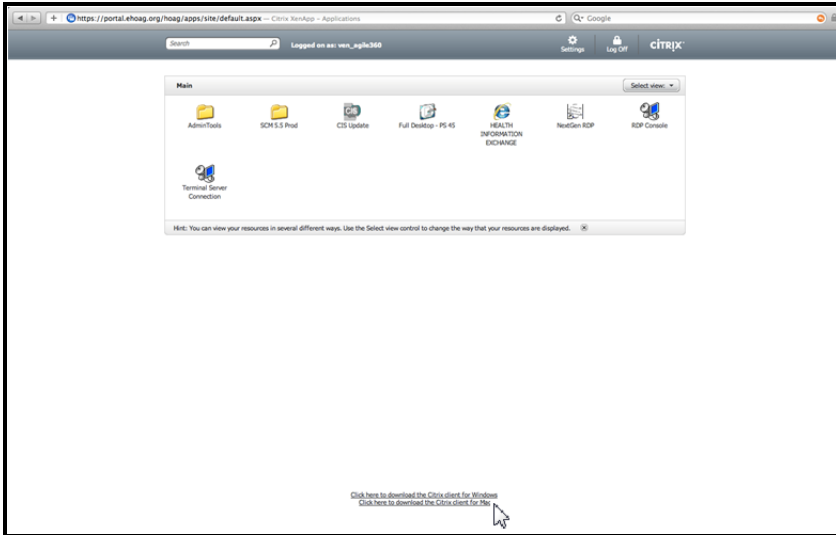

- Mac OS 10.6 or Mac OS 10.7 (Lion), 32 or 64 bit
- Safari 4.x, or Firefox 3.x
- Broadband access to Internet

NOTE: If you experience any difficulties during this installation, please contact IT Support at 949-764-8600, option 2

1. Open Safari  and browse to <https://portal.ehoag.org>
2. The Logon Page appears

3. Login using your Active Directory Username and Password (ex: **MS1234**, and your Password)
4. Once you have logged in, your applications screen will appear
5. Click on the link at the bottom of the page that reads **"Click here to download the Citrix client for Mac"**

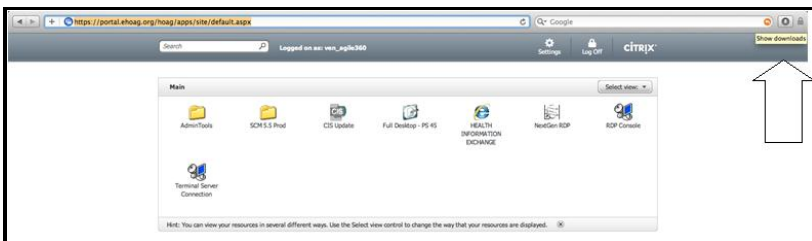

6. The Download progress indicator will appear in the upper right-hand corner of Safari

7. If you click on the download indicator, detailed information will be presented

8. The progress indicator changes once the download is complete

9. Click on the download indicator and then double-click the **Citrixmac.dmg** file. The screen will quickly flash and your install will be complete.

10. Return to the application screen to launch your applications
